

## Non-Contact Voltage Testing and Detection

# 3120

### AC Voltage Detector

- ▶ Sensitivity level catered to 120V installations
- ▶ 70 to 600 AC V

When applying any voltage detector, always test on known live before and after use

CATIV 600V/  
CATIII 1000V Safe

Bright red light and clear buzzer warns of live voltage

Bright green light indicates sufficient power supply

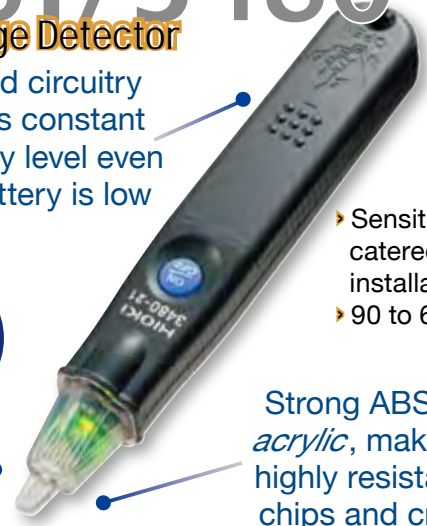

# 3481/3480

### AC Voltage Detector

Advanced circuitry maintains constant sensitivity level even when battery is low

- ▶ Sensitivity level catered to 200V installations
- ▶ 90 to 600 AC V

Strong ABS, *not acrylic*, makes tip highly resistant to chips and cracks

### World's First!

Non-metallic resin test probes prevents electric shock

True RMS method measures 30 to 600V AC accurately and displays on a crystal clear LCD

# 3258

### Safety Hi-Tester

HIOKI's proprietary technology lets you measure right through line insulation

# 3129-10

### Phase Detector

Compact body fits neatly in the palm of your hands

CATIV 600V/  
CATIII 1000V Safe

Absolutely NO metal exposure ensures safety at the worksite

Bright Red LED and crystal clear buzzer

Extra-wide clips to clamp up to 40mm thick conductors

- ▶ 70 to 1000 AC V (max 600V AC V on the 3129)
- ▶ Auto power off saves battery life

CATIII 600V
